- b) "Garbage" includes animal and vegetable waste resulting from the handling, preparation, cooking and consumption of foods. It is composed largely of organic matters and their natural moisture content. The term does not include within its meaning food processing waste from canneries, slaughterhouses, packing plants, or similar industries, or large quantities of condemned food products. Garbage originates primarily in kitchens, stores, markets, restaurants, hotels, and other places where food is stored, cooked or consumed.

- e) "Rubbish" means all refuse not included in garbage. It consists of a great variety of combustible and noncombustible waste materials from households, stores and institutions.
